MACH UT850.23AP UNDER-COUNTER UTENSIL WASHER 500MM BASKET

The **Mach Tall Utensil Washer** has been designed as a universal machine to meet all the dishwashing and utensil washing requirements of a commercial kitchen. With a tall clear-entry height and compact footprint, it can wash gastronorm containers and still fit anywhere a normal commercial dishwasher would. Featuring a remarkable load capacity, this dishwasher utensilwasher is capable of washing standard 60x40 baking trays and GN 1/1 gastronorm containers. It is also ideally suited for easy installation into existing washrooms, sitting comfortably underneath standard single or double bowl sink tabling or counter tops.

Universal 500mm Stainless Steel Basket

Accepts standard 50cm dishwasher baskets for integration with existing systems.

Touch Screen

Features a 5-cycle touch screen panel with countdown timer and digital thermometers.

Fully Automatic Operation

Equipped with fully automatic operation with micro stop switch if the door is opened. Selectable 60, 90, 120, 180 or 360 second wash cycles with integrated electronic detergent and rinse aid dispensers as standard.

Italian Build Quality

Designed and built in Italy. Armoured heating elements with thermostatic protection in the tank and boiler. Wide range of optional extras and accessories to suit your washing requirements.

Doubled Walled Washing Chamber

Equipped with a double walled chamber for higher thermal efficiency and better acoustic insulation. The moulded wash tank also features rounded corners and edges for easier cleaning.

All Stainless Steel Components

AISI304 stainless steel components including armoured stainless steel elements, stainless steel boiler, filters, hinges, wash arms, rinse arms, plugs and jets.

1 Year Warranty

1 Year parts warranty as standard

Compact Dimensions

The compact dimensions allow it to fit under standard dishwasher tabling, sinks and cabinets.
